The Department for International Trade

The UK's Department for International Trade (DIT) has overall responsibility for promoting UK trade across the world and attracting foreign investment to our economy. We are a specialised government body with responsibility for negotiating international trade policy, supporting business as well as delivering outward-looking trade diplomacy strategy.

Contacts at the Department for International Trade (DIT)

If you would like to arrange meetings with the UK companies attending Cybertech Europe 2018 to explore new collaboration opportunities, please contact the DSO Italy team at

digital shadows

Digital Shadows provides insight into an organisation's external digital risks and the threat actors targeting them. The Digital Shadows SearchLight™ service combines scalable data analytics with human analysts to monitor for cyber threats, data leakage and reputational risks.

Digital Shadows continually monitors the Internet across the visible, deep and dark web, as well as other online sources, to create an up-to-the minute view of an organisation and provide it with tailored threat intelligence. The company is jointly headquartered in London and San Francisco.

Products:

1. **DIGITAL RISK MANAGEMENT.** For the last 20 years we have focused on protecting our networks, but now the boundaries have disappeared. Our digital footprints are expanding like never before.
2. **DIGITAL SHADOWS SEARCHLIGHT.** The SearchLight™ service combines scalable data analytics with human data analysts to manage and mitigate digital risks.
3. **PROFESSIONAL SERVICES.** Get actionable insights, researched and produced by our team of extremely skilled analysts.
4. **DIGITAL SHADOWS PARTNERS.** Digital Shadows partners with industry-leading technology and channel partners to deliver our innovative SearchLight™ service to customers around the world.

Garrison Technology Ltd

Name: David Garfield

Role: Co-founder & CEO

Tel: 0044 0203 890 4504

Company Website: <https://www.garrison.com/>

Garrison has pioneered an innovative **security platform** to counter the highest impact cyber threat to modern enterprises: that of persistent and targeted attacks which exploit corporate Internet connectivity. Browse the web, click on any link, open any attachment – Garrison’s unique hardware-enforced approach to remote browsing provides **risk free Internet access** that is commercially affordable, highly secure, and delivers a great user experience at enterprise scale.

Garrison **Silicon-Assured Video Isolation** (Garrison SAVI®) is a secure remote browsing technology that prevents risky web contents from being processed on the user’s endpoint device. It is available both as an on-site appliance and as a cloud- based service.

Alongside SAVI technology, Garrison has developed **Silicon Assured Content Sanitisation Technology** (SACS®) which allows risk-free transfer of copy and paste data and print jobs so as to offer a fully safe Internet experience.

Global Intelligence Insight Ltd

Name: Vasco Da Cruz Amador

Role: CEO & Founder

Email: vdca@globalintelligenceinsight.com

Company Website: <http://globalintelligenceinsight.com/>

**GLOBAL
INTELLIGENCE
INSIGHT**

reducing your risk
through targeted
intelligence

Global Intelligence Insight is a Cyber Intelligence company gathering information from protected channels, deep and dark web and social media platforms to deliver detailed analysis and live feed insights through a combination of automated monitoring algorithms and human analysis of data.

Boasting more than 20 years of experience, it supports corporate, security, militaries, federal, state and local governments, as well as other government agencies. Global Intelligence Insight specialises in **intel collection, analysis of surface web traffic, monitoring of protected channels on the deep and dark web, invitation-only channels and social media platforms**. It also elaborates intelligence reports & assessments and wargames with diverse types of crisis scenarios developed in real-time. It is equipped with preventive tools that are capable of reacting before incidents occur.

Deliverables include:

1. **CYBER COVERT OPERATIONS** which, by making analysts invisible to cyber criminals, illicit actors and jihadists, access invitation-only channels in end to end encrypted communications networks.
2. **MONITORING OF DEEP/ DARK WEB CLOSED FORUMS**, in particular groups, channels and invitation-only platforms.
3. **INTERACTION WITH MULTIPLE INVITE-ONLY GROUPS**, approximately 100 groups from a few hundred members to tasking groups of less than 10 members.
